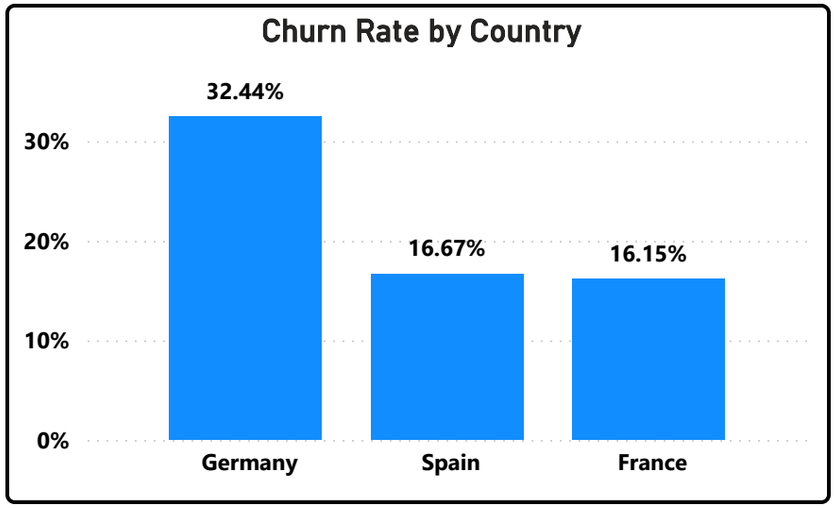
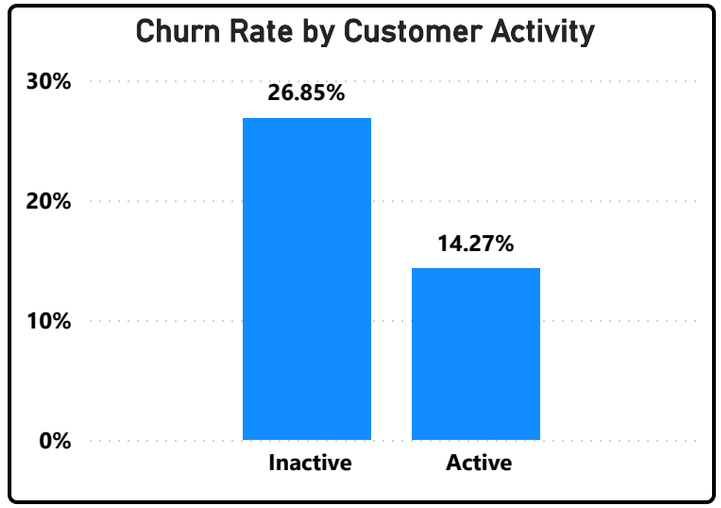
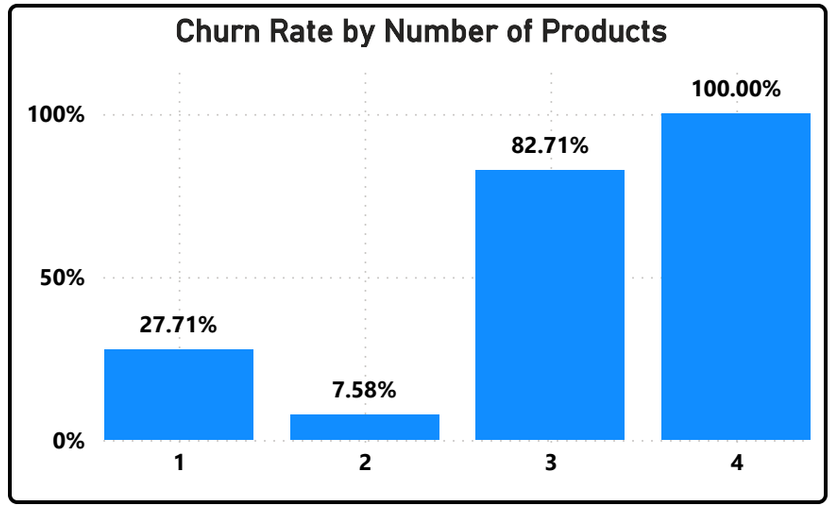
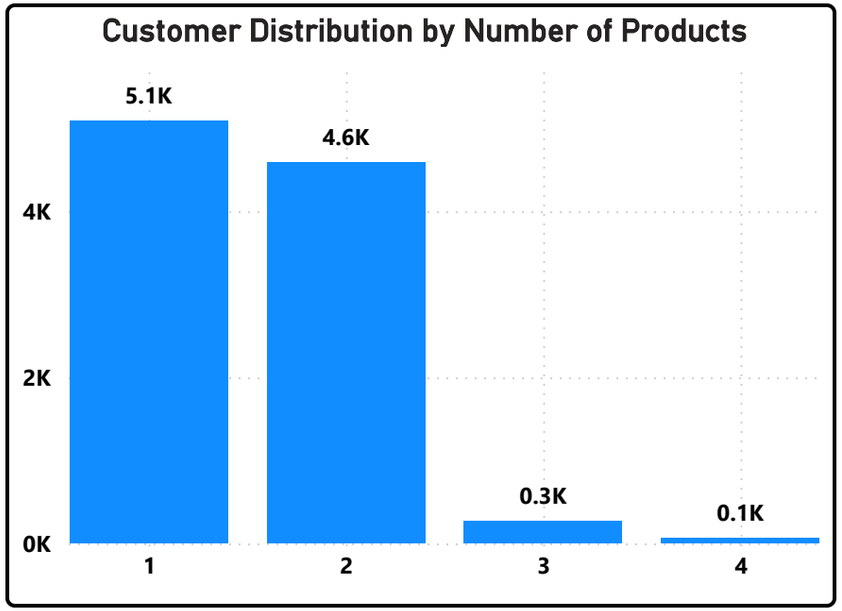
Customer Churn Analysis

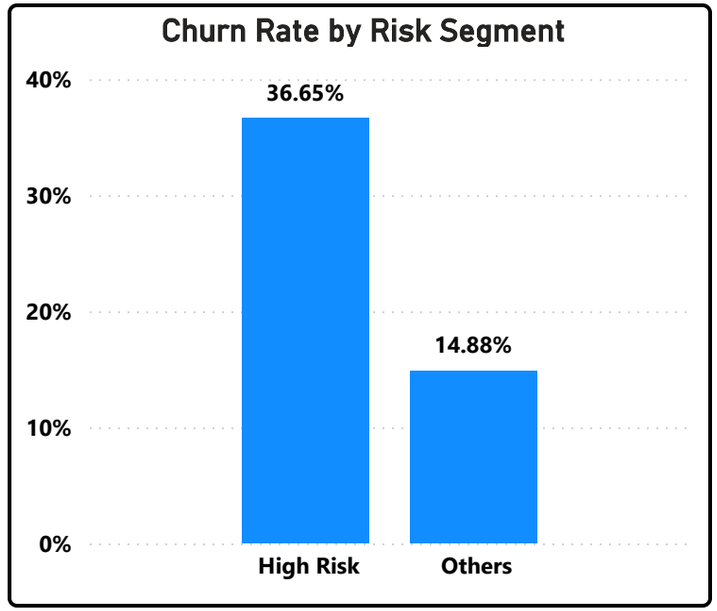
Total Customers	Churned Customers	Churn Rate (%)
10K	2037	20.37%











*Note: High churn for customers with 3–4 products is based on a small sample size and may not be statistically reliable.

France	Germany	Spain

Female	Male

Key Insight :

The highest churn risk is driven by inactive customers with only one product, particularly in Germany.
This segment represents a key opportunity for targeted retention strategies focused on increasing engagement and product adoption.
